

CMU SCS

Carnegie Mellon Univ.  
Dept. of Computer Science  
15-415/615 - DB Applications

*C. Faloutsos - A. Pavlo*  
Lecture#2: E-R diagrams

CMU SCS

## Administrivia

- Course url:
  - <http://15415.courses.cs.cmu.edu/>
- Course policies
  - <http://15415.courses.cs.cmu.edu/fall2016/policies.html>
- Foils in pps:
  - <http://15415.courses.cs.cmu.edu/fall2016/slides-pps/>

Faloutsos - Pavlo CMU SCS 15-415/615 2

CMU SCS

## Course Topics

✓ Introduction to DBMSs

- Data Models
- Query Language (SQL)
- Database Design
- Query Optimization & Indexing
- Transaction Management
- Advanced Topics

Faloutsos/Pavlo CMU SCS 15-415/615 3

CMU SCS

## Problem

- Develop an application for U.G. admin:
  - Student info
  - Who-takes-what class
  - Class rosters
  - Transcripts
- How do you proceed?
  - (Which role(s) are you playing?)

Faloutsos - Pavlo CMU SCS 15-415/615 4

CMU SCS

## Database users

- ‘naive’ users
- casual users
- application programmers
- [ DBA (Data base administrator)]

Faloutsos/Pavlo CMU SCS 15-415/615 5

CMU SCS

## Casual users

select \*  
from student

DBMS

data and meta-data =  
catalog

Faloutsos/Pavlo CMU SCS 15-415/615 6

CMU SCS

## ‘Naive’ users

Pictorially:

app. (eg.,  
report generator)

DBMS

data and meta-data =  
catalog

Faloutsos/Pavlo CMU SCS 15-415/615 7

CMU SCS

## App. programmers

- Authors of applications (like the ‘report generator’)

app. (eg., report generator)

DBMS

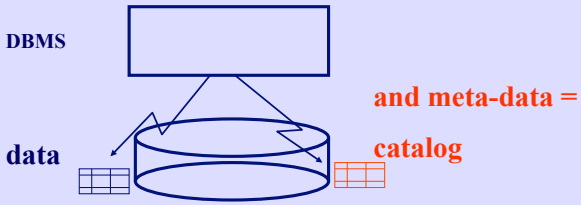

data and meta-data =  
catalog

Faloutsos/Pavlo CMU SCS 15-415/615 8

CMU SCS

## DB Administrator (DBA)

- Duties?

DBMS

data

and meta-data =

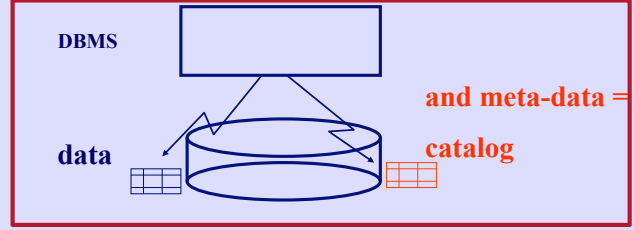

catalog

Faloutsos/Pavlo CMU SCS 15-415/615 9

CMU SCS

## DB Administrator (DBA)

- Duties?

DBMS

data

and meta-data =

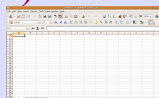

catalog

Faloutsos/Pavlo CMU SCS 15-415/615 10

CMU SCS

## DB Administrator (DBA)

- schema definition (‘logical’ level)
- physical schema (storage structure, access methods)
- schema modifications
- granting authorizations
- integrity constraint specification

Faloutsos/Pavlo CMU SCS 15-415/615 11

CMU SCS

## Problem

- Develop an application for U.G. admin:
  - Student info
  - Who-takes-what class
  - Class rosters
  - Transcripts
- How do you proceed?
  - (Which role(s) are you playing?)

Faloutsos - Pavlo CMU SCS 15-415/615 12

CMU SCS

## Database users

- 'naive' users
- casual users
- ➔ application programmers
- ➔ [ DBA (Data base administrator)]

Faloutsos/Pavlo CMU SCS 15-415/615 13

CMU SCS

## Database Design

- Requirements Analysis
- Conceptual Design
- Logical Design
- Schema Refinement
- Physical Design
- Security Design

Faloutsos - Pavlo CMU SCS 15-415/615 14

CMU SCS

## Database Design

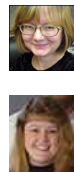

- ✓ Requirements Analysis user's needs
- **Conceptual Design** high level (ER)
- Logical Design Tables
- Schema Refinement Normalization
- Physical Design Indices etc
- Security Design Access controls

Faloutsos - Pavlo CMU SCS 15-415/615 15

CMU SCS

## Maintain 'Problem'

- ~~Develop~~ an application for U.G. admin:
  - Student info
  - Who-takes-what class
  - Class rosters
  - Transcripts
- If you are the \*new\* DBA, what would you rather inherit:

Faloutsos - Pavlo CMU SCS 15-415/615 16

CMU SCS

**This or this ?**

```
drop table if exists student;
create table student
(ssn fixed,
 name char(20));
drop table if exists takes;
create table takes
(ssn fixed,
 cid char(10),
 grade fixed);
```

```

graph TD
    Student[Student] --- Takes{Takes}
    Takes --- Course[Course]
  
```

Faloutsos - Pavlo CMU SCS 15-415/615 17

CMU SCS

**True story** 

- Health insurance company
- Wants to catch (some of the abundant) fraud
- Schema:
  - patients, visit doctors, get medicine,
  - Doctors perform operations, ...
  - Nurses monitor patients, ...
  - etc etc
- Q: How many tables do you think it spans?

Faloutsos - Pavlo CMU SCS 15-415/615 18

CMU SCS

**True story** 

- Schema:
  - patients, visit doctors, get medicine,
  - Doctors perform operations, ...
  - Nurses monitor patients, ...
  - etc etc
- Q: How many tables do you think it spans?  
10? 20? 30?

Faloutsos - Pavlo CMU SCS 15-415/615 19

CMU SCS

**True story** 

- Schema:
  - patients, visit doctors, get medicine,
  - Doctors perform operations, ...
  - Nurses monitor patients, ...
  - etc etc
- Q: How many tables do you think it spans?  
10? ~~20~~ 30?
- A: **120 PAGES** of schema

Faloutsos - Pavlo CMU SCS 15-415/615 20

CMU SCS

## Motivation & upcoming conclusion:

- E-R diagrams are excellent documentation tools

```

drop table if exists student;
create table student
(ssn fixed,
 name char(20));
drop table if exists takes;
create table takes
(ssn fixed,
 cid char(10),
 grade fixed);
    
```

```

graph TD
    Student[Student] --- Takes{Takes}
    Takes --- Course[Course]
    
```

Faloutsos - Pavlo CMU SCS 15-415/615 21

CMU SCS

## Overview

- concepts
  - Entities
  - Relationships
  - Attributes
  - Specialization/Generalization
  - Aggregation
  - ER modeling questions

Basic

Advanced/  
rare

Faloutsos - Pavlo CMU SCS 15-415/615 22

CMU SCS

## Tools

Entities ('entity sets')

Relationships ('rel. sets') and mapping constraints

attributes

```

graph TD
    Student[Student] --- Takes{Takes}
    Takes --- Course[Course]
    
```

Faloutsos - Pavlo CMU SCS 15-415/615 23

CMU SCS

## Example

Students, taking courses, offered by instructors; a course may have multiple sections; one instructor per section

nouns -> entity sets  
verbs -> relationship sets

Faloutsos - Pavlo CMU SCS 15-415/615 24

CMU SCS

## Example

Students, taking courses, offered by instructors; a course may have multiple sections; one instructor per section

nouns -> entity sets  
verbs -> relationship sets

Faloutsos - Pavlo CMU SCS 15-415/615 25

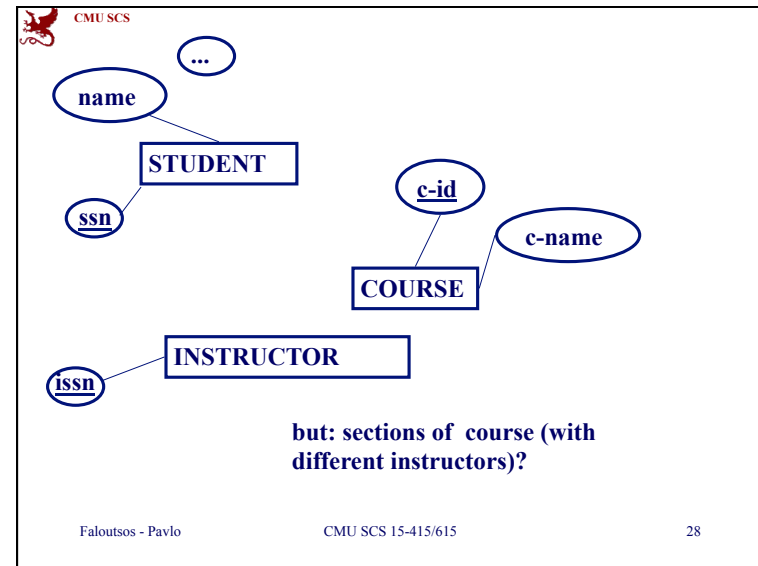

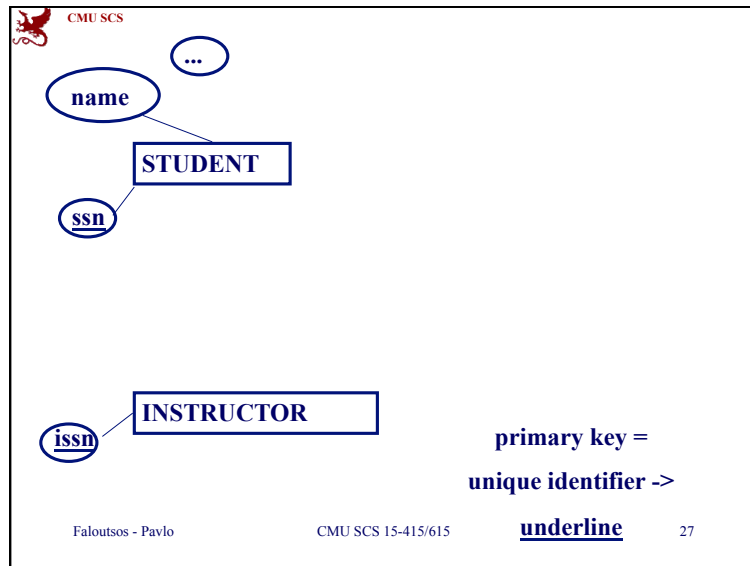

CMU SCS

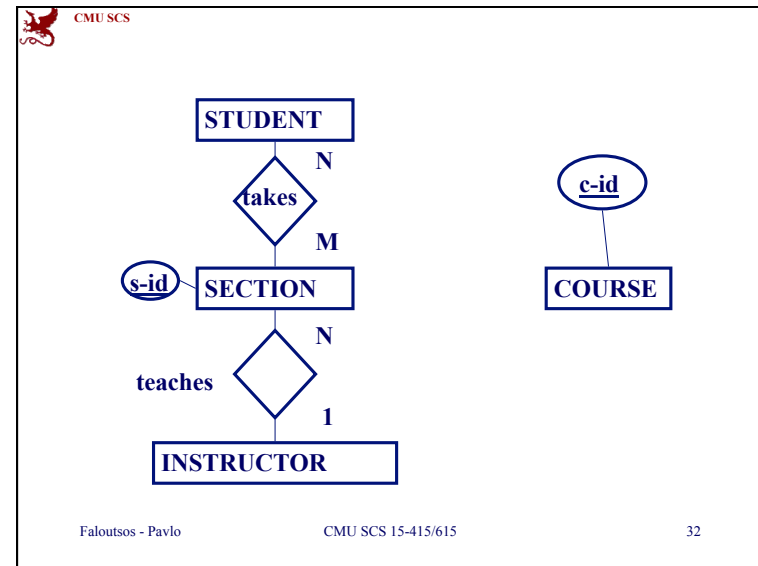

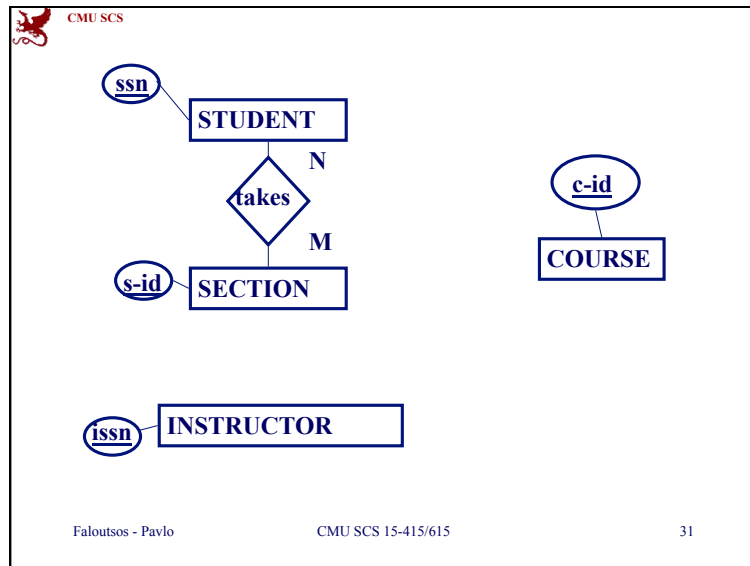

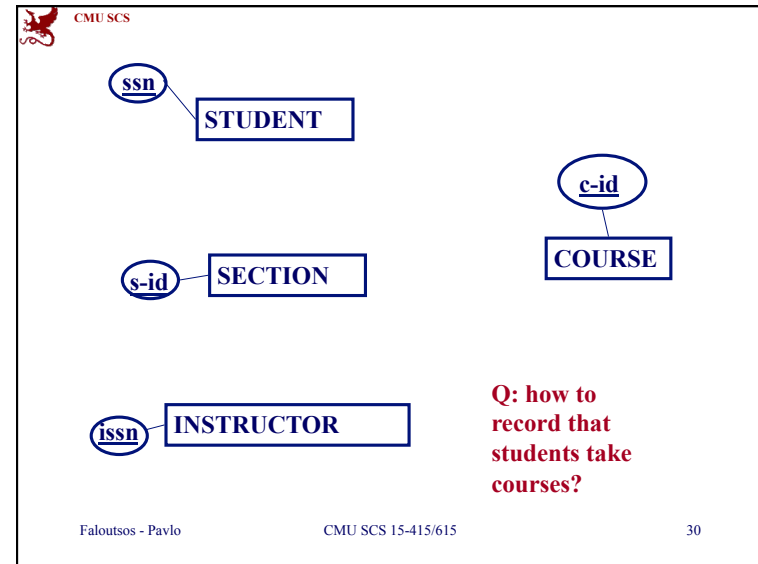

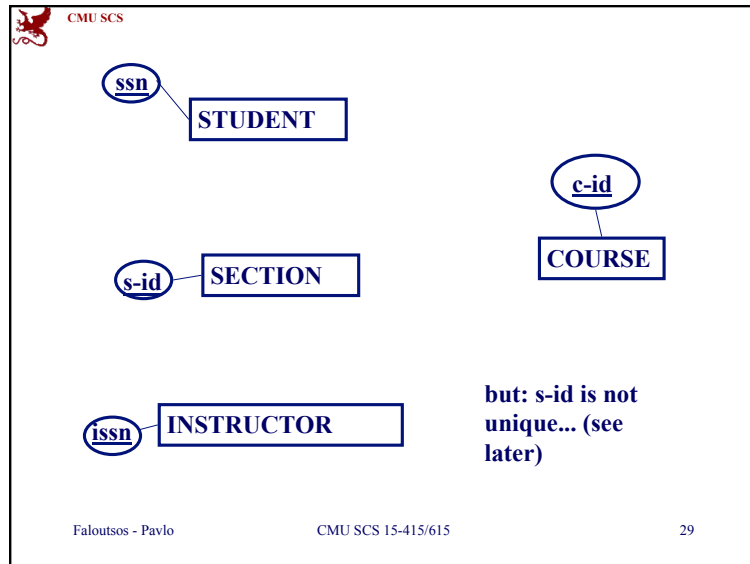

## Example

Students, taking courses, offered by instructors; a course may have multiple sections; one instructor per section

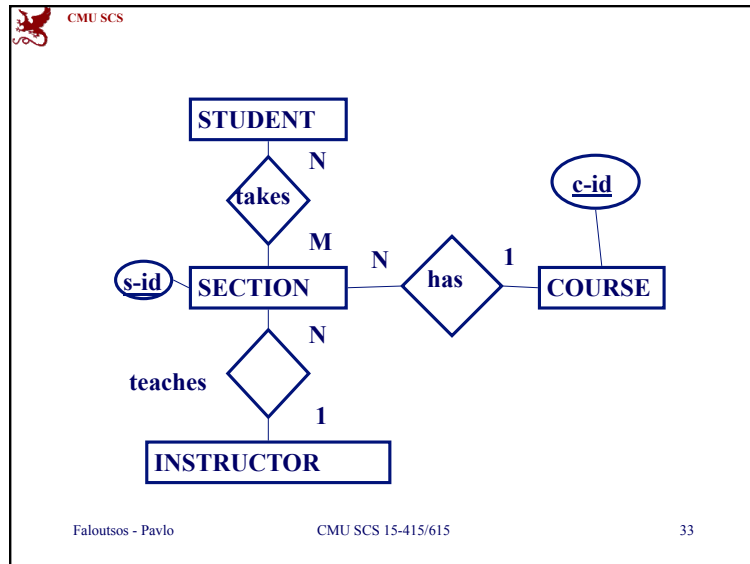

nouns -> entity sets  
verbs -> relationship sets

Faloutsos - Pavlo CMU SCS 15-415/615 26

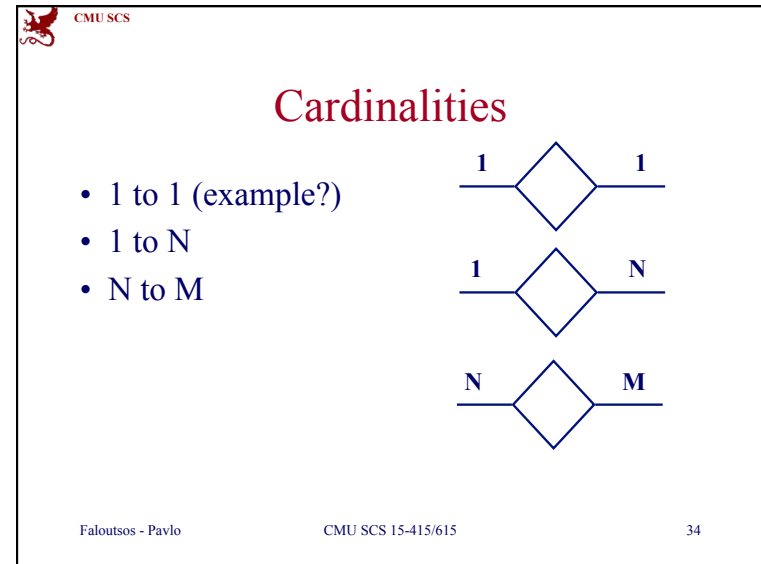

Faloutsos - Pavlo

CMU SCS 15-415/615

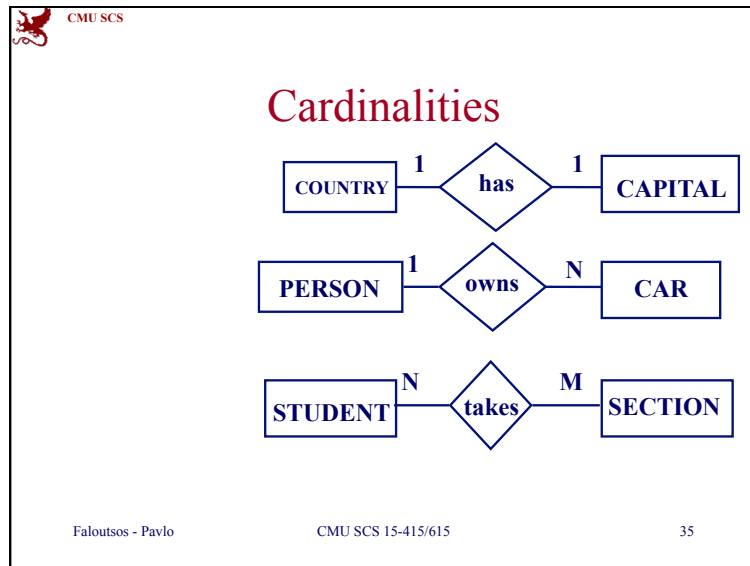

33

Faloutsos - Pavlo

CMU SCS 15-415/615

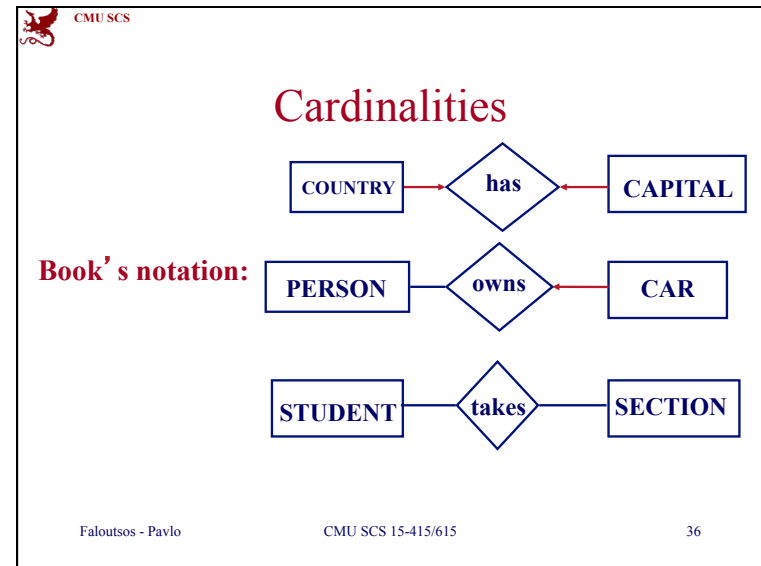

34

Faloutsos - Pavlo

CMU SCS 15-415/615

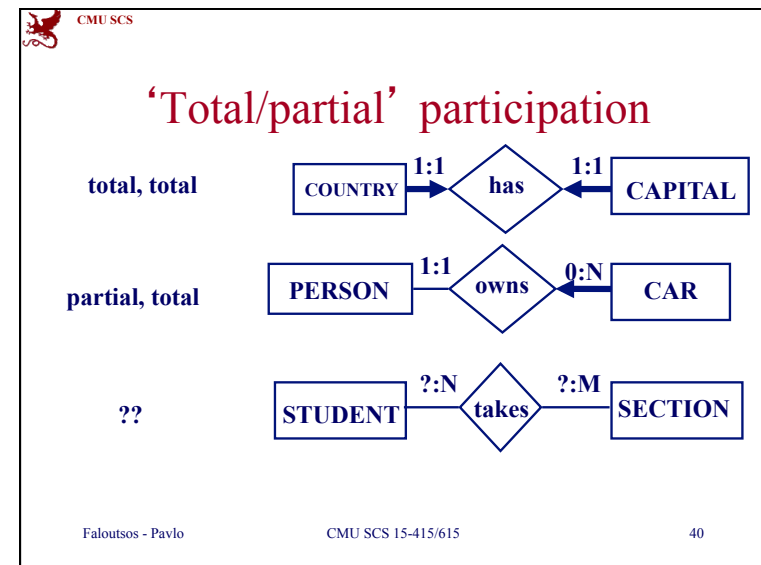

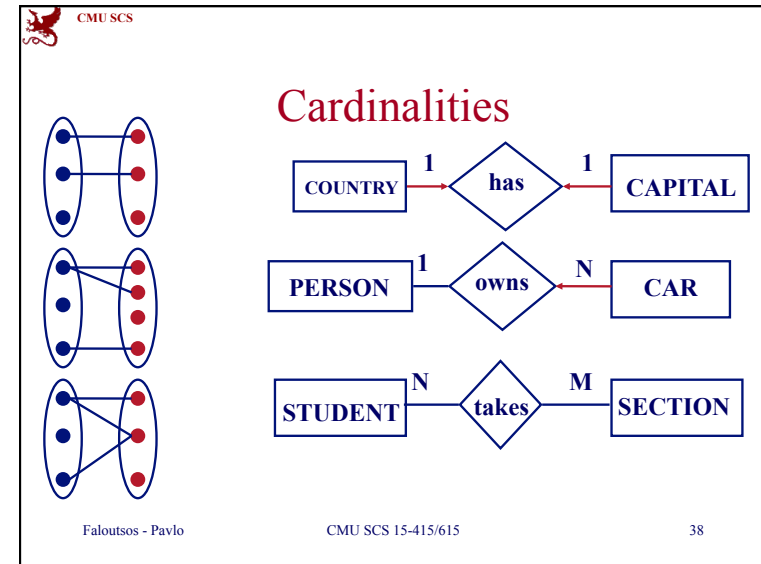

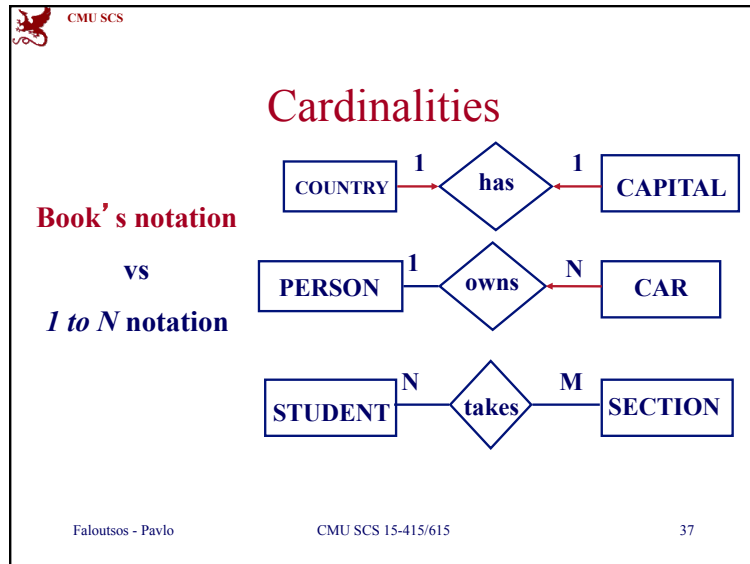

35

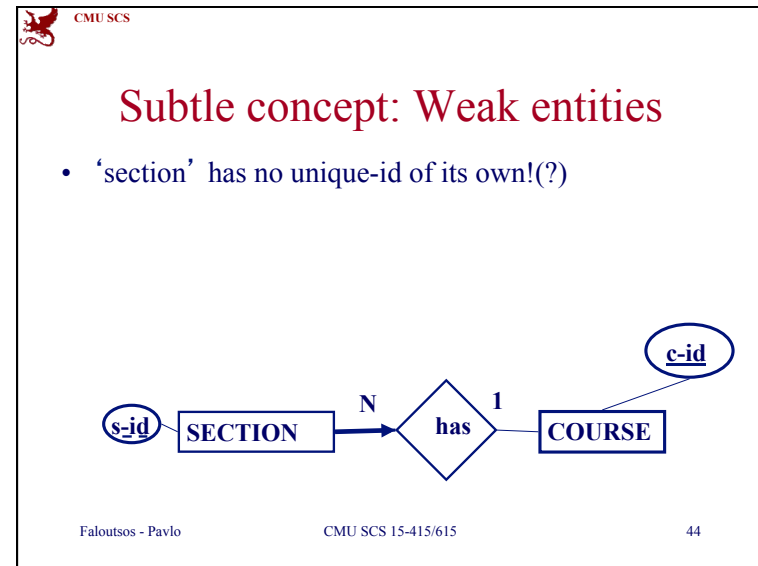

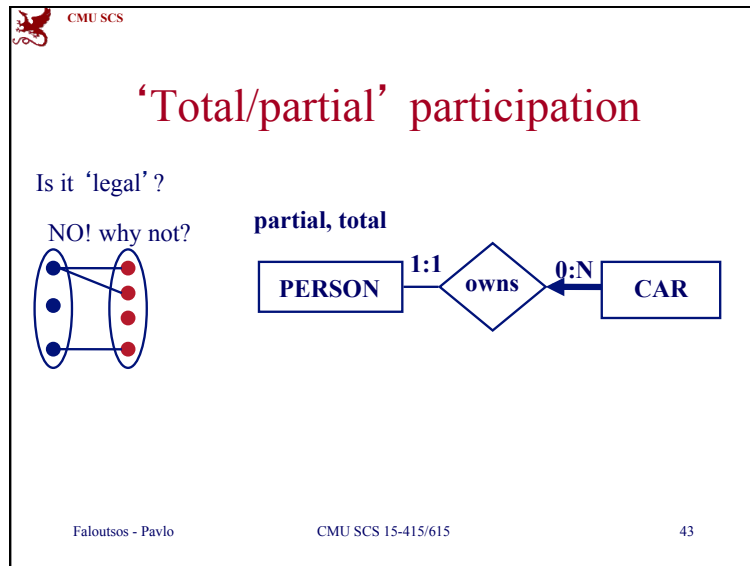

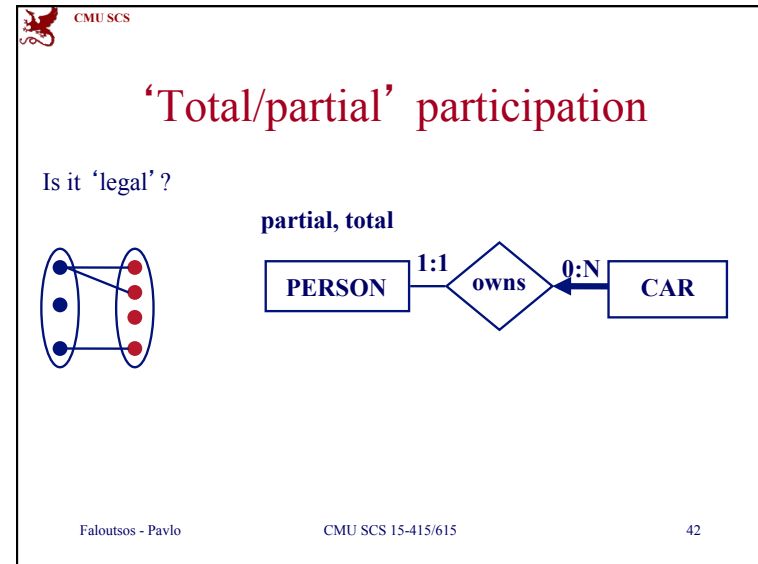

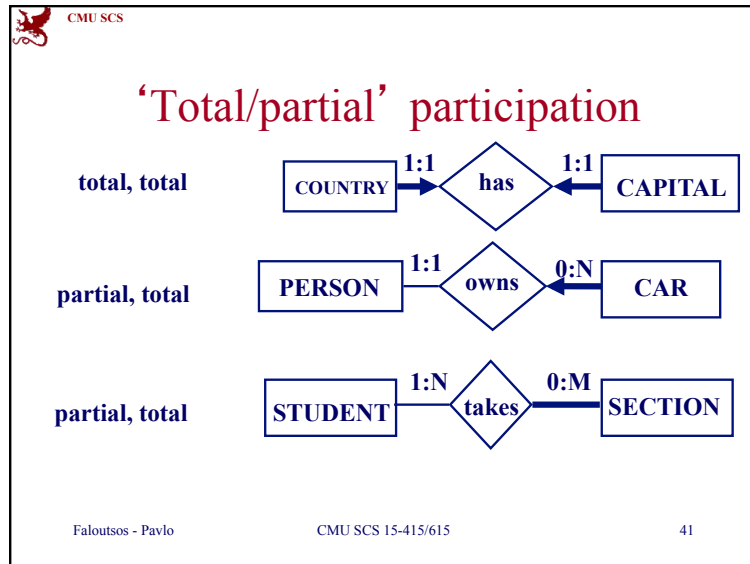

Faloutsos - Pavlo

CMU SCS 15-415/615

36

**Weak entities**

- **'weak'** entities: if they need to borrow a unique id from a **'strong entity - thick box**.
- **'c-id' + 's-id'** : unique id for SECTION
- **partial key** (eg., 's-id') - dashed-underline
- **identifying relationship** (eg., 'has')

Faloutsos - Pavlo
CMU SCS 15-415/615
45

**Weak entities**

- Other example(s) of weak entities?

Faloutsos - Pavlo
CMU SCS 15-415/615
46

**Weak entities**

- Other example(s) of weak entities?

Faloutsos - Pavlo
CMU SCS 15-415/615
47

**More details**

- self-relationships - example?

Faloutsos - Pavlo
CMU SCS 15-415/615
48

CMU SCS

### More details

- self-relationships - example?

```

    erDiagram
        EMPLOYEE ||--o{ EMPLOYEE : manages
    
```

Faloutsos - Pavlo CMU SCS 15-415/615 49

CMU SCS

### More details

- self-relationships - example?

```

    erDiagram
        FB_user ||--o{ FB_user : Has-friend
    
```

Faloutsos - Pavlo CMU SCS 15-415/615 50

CMU SCS

### More details

- 3-way and k-way relationships?

Faloutsos - Pavlo CMU SCS 15-415/615 51

CMU SCS

### More details

- 3-way and k-way relationships? Rare, but possible:

```

    erDiagram
        EMPLOYEE ||--o{ uses
        TOOL ||--o{ uses
        PROJECT ||--o{ uses
    
```

Faloutsos - Pavlo CMU SCS 15-415/615 52

CMU SCS

## More details

- 3-way and k-way relationships? Rare, but possible:

Other cases?

Faloutsos - Pavlo CMU SCS 15-415/615 53

CMU SCS

## More details

- 3-way and k-way relationships? Rare, but possible:

App-store/amazon reviews

Faloutsos - Pavlo CMU SCS 15-415/615 54

CMU SCS

## Overview

- concepts
  - Entities
  - Relationships
  - – Attributes
  - Specialization/Generalization
  - Aggregation
  - ER modeling questions

Faloutsos - Pavlo CMU SCS 15-415/615 55

CMU SCS

## More details - attributes

- key** (or **primary key**): unique identifier
- underlined, in the ER diagram
- [not in textbook - FYI:
  - **multivalued** or set-valued attributes (eg., 'dependents' for EMPLOYEE)
  - **derived** attributes (eg., 15% tip)

Faloutsos - Pavlo CMU SCS 15-415/615 56

CMU SCS

## Overview

- concepts
  - Entities
  - Relationships
  - Attributes
  - ➔ – Specialization/Generalization
  - Aggregation
  - ER modeling questions

}

Basic

}

Advanced/  
rare

Faloutsos - Pavlo CMU SCS 15-415/615 57

CMU SCS

## Specialization

- eg., students: part time (#credit-hours) and full time (major)

```

    graph TD
      STUDENT[STUDENT] --- name((name))
      STUDENT --- ssn((ssn))
      STUDENT -- IS-A --> FT_STUDENT[FT-STUDENT]
      STUDENT -- IS-A --> PT_STUDENT[PT-STUDENT]
      FT_STUDENT --- major((major))
      PT_STUDENT --- credits((#credits))
    
```

Faloutsos - Pavlo CMU SCS 15-415/615 58

CMU SCS

## Observations

- Generalization: exact reverse of ‘specialization’
- attribute inheritance
- could have **many** levels of an IS-A hierarchy

Faloutsos - Pavlo CMU SCS 15-415/615 59

CMU SCS

## More details

- Overlap constraints
- Covering constraints

```

    graph TD
      A[A] --- B[B]
      A --- C[C]
    
```

Faloutsos - Pavlo CMU SCS 15-415/615 60

CMU SCS

## More details

- Overlap constraints
  - can an entity belong to both 'B' and 'C'?
- Covering constraints
  - can an 'A' entity belong to neither 'B' nor 'C'?

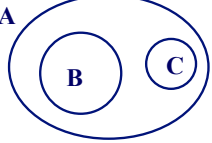

Faloutsos - Pavlo CMU SCS 15-415/615 61

CMU SCS

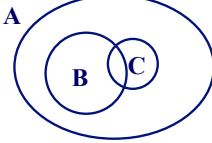

## More details

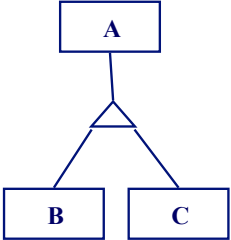

- Overlap constraints - examples?

No overlap

with overlap

Faloutsos - Pavlo CMU SCS 15-415/615 62

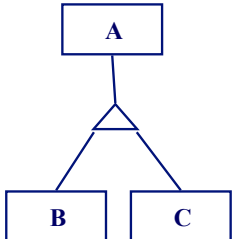

CMU SCS

## More details

- Covering constraints - examples?

**Total coverage**

**Partial coverage**

Faloutsos - Pavlo CMU SCS 15-415/615 63

CMU SCS

## Overview

- concepts
  - Entities
  - Relationships
  - Attributes
  - Specialization/Generalization
  - ➔ – Aggregation
  - ER modeling questions

Faloutsos - Pavlo CMU SCS 15-415/615 64

CMU SCS

## Aggregation

- computer model (w/ CPU and HD)
- and Maker (eg., Dell, HP)

Faloutsos - Pavlo      CMU SCS 15-415/615      65

CMU SCS

## Aggregation

- treat a relationship as an entity
- used to express a relationship among relationships

Faloutsos - Pavlo      CMU SCS 15-415/615      66

CMU SCS

## Overview

- concepts
  - Entities
  - Relationships
  - Attributes
  - Specialization/Generalization
  - Aggregation
  - ➔ – ER modeling questions

Faloutsos - Pavlo      CMU SCS 15-415/615      67

CMU SCS

## Conceptual design

- Entity vs attribute
- Entity vs relationship
- Binary or ternary relationships?
- Aggregation?

Faloutsos - Pavlo      CMU SCS 15-415/615      68

CMU SCS

## Entity vs. attribute

- Entity EMPLOYEE (w/ emp#, name, job\_code, ...)
- Q: How about 'spouse' - entity or attribute?
- Q: How about 'dependents' ?

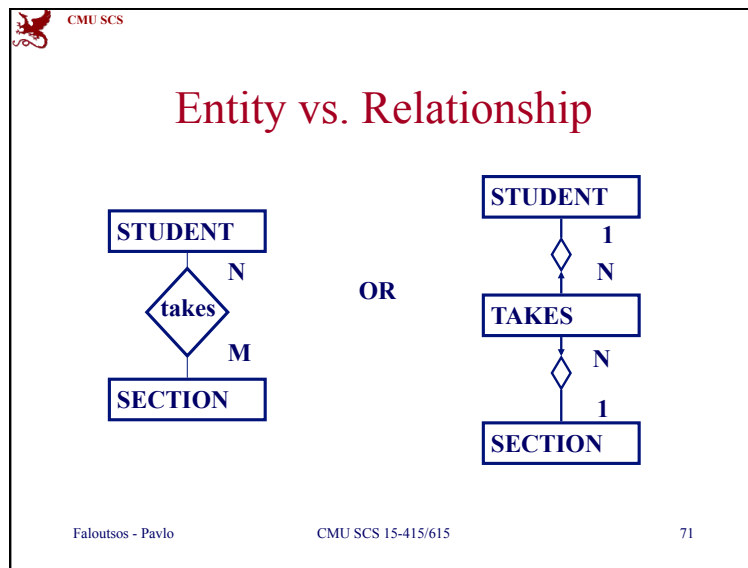

Faloutsos - Pavlo CMU SCS 15-415/615 69

CMU SCS

## Entity vs. attribute

- Entity EMPLOYEE (w/ emp#, name, job\_code, ...)
- Q: How about 'spouse' - entity or attribute?
- A: probably, 'attribute' is enough
- Q: How about 'dependents' ?
- A: Entity - we may have many dependents

Faloutsos - Pavlo CMU SCS 15-415/615 70

CMU SCS

## Binary vs Ternary Relationships

- usually, binary relationships are 'cleaner' :

Faloutsos - Pavlo CMU SCS 15-415/615 72

CMU SCS

## Binary vs. Ternary Relationships

If each policy is owned by just 1 employee:

Faloutsos - Pavlo CMU SCS 15-415/615 73

CMU SCS

## Binary vs. Ternary Relationships

If each policy is owned by just 1 employee:

Bad design

Faloutsos - Pavlo CMU SCS 15-415/615 74

CMU SCS

## Binary vs. Ternary Relationships

If each policy is owned by just 1 employee:

Bad design

**Key constraint on Policies would mean policy can only cover 1 dependent!**

Faloutsos - Pavlo CMU SCS 15-415/615 75

CMU SCS

## Binary vs. Ternary Relationships

If each policy is owned by just 1 employee:

Bad design

**Key constraint on Policies would mean policy can only cover 1 dependent!**

**What are the additional constraints in the 2nd diagram?**

Better design

Faloutsos - Pavlo CMU SCS 15-415/615 76

CMU SCS

## Binary vs Ternary Rel.

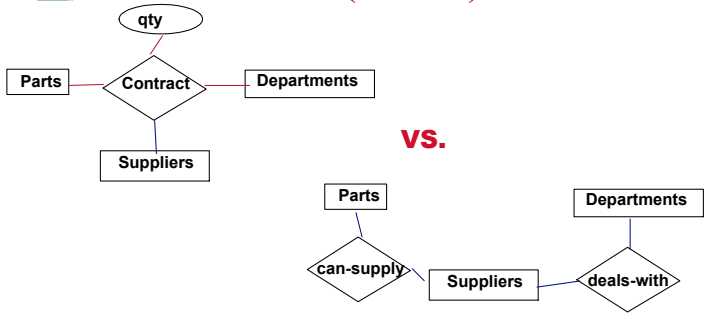

- But sometimes ternary rel. can not be replaced by a set of binary rel' s:

Faloutsos - Pavlo CMU SCS 15-415/615 77

CMU SCS

## Binary vs. Ternary Relationships (Contd.)

**vs.**

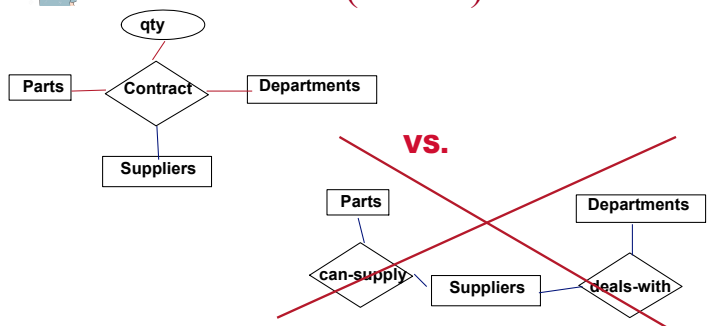

**why is it bad?**

Faloutsos - Pavlo CMU SCS 15-415/615 78

CMU SCS

## Binary vs. Ternary Relationships (Contd.)

**vs.**

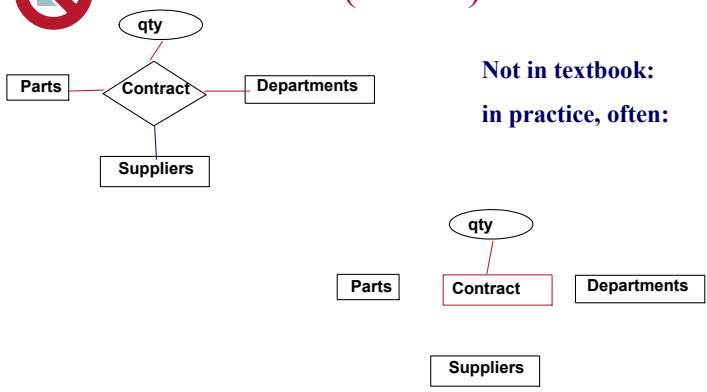

- S "can-supply" P, D "needs" P, and D "deals-with" S does not imply that D has agreed to buy P from S.
- How do we record *qty*?

Faloutsos - Pavlo CMU SCS 15-415/615 79

CMU SCS

## Binary vs. Ternary Relationships (Contd.)

**Not in textbook:  
in practice, often:**

Faloutsos - Pavlo CMU SCS 15-415/615 80

CMU SCS

## Binary vs. Ternary Relationships (Contd.)

Not in textbook:  
in practice, often:

Faloutsos - Pavlo CMU SCS 15-415/615 81

CMU SCS

## Binary vs. Ternary Relationships (Contd.)

Not in textbook:  
in practice, often:

Faloutsos - Pavlo CMU SCS 15-415/615 82

CMU SCS

## Ternary vs. aggregation

- use aggregation, if we want to attach a relationship to a relationship
- (see book for example)
- (in practice, again we create a unique-id and resort to binary relationships)

Faloutsos - Pavlo CMU SCS 15-415/615 83

CMU SCS

## Ternary vs. aggregation

- How would you handle this case?

Faloutsos - Pavlo CMU SCS 15-415/615 84

CMU SCS

## Ternary vs. aggregation

- How would you handle this case?

Faloutsos - Pavlo CMU SCS 15-415/615 85

CMU SCS

## Ternary vs. aggregation

- How would you handle this case?

Faloutsos - Pavlo CMU SCS 15-415/615 86

CMU SCS

## Ternary vs. aggregation

- How would you handle this case?

Faloutsos - Pavlo CMU SCS 15-415/615 87

CMU SCS

## Summary

- E-R Diagrams: a powerful, user-friendly tool for data modeling:
  - Entities (strong, weak)
  - Attributes (primary keys, discriminators, derived, multivalued)
  - Relationships (1:1, 1:N, N:M; multi-way)
  - Generalization/Specialization; Aggregation

Faloutsos - Pavlo CMU SCS 15-415/615 88

CMU SCS

## Summary

- E-R Diagrams: a powerful, user-friendly tool for data modeling:
  - Entities (strong, weak)
  - Attributes (primary keys, discriminators, derived, multivalued)
  - Relationships (1:1, 1:N, N:M; multi-way)
  - Generalization/Specialization; Aggregation

**POPULAR**

Faloutsos - Pavlo      CMU SCS 15-415/615      89

CMU SCS

## Summary - cont' d

	(strong) entity set		attribute
	weak entity set		primary key
	relationship set		partial key
	identifying rel. set for weak entity
